INTEGRATIVE MEDICINE

THALASSO CLINIC PALASIET

At Palasiet Thalasso Clinic we base our work on integrative medicine in order to address and care for the global aspects that affect people's health and well-being. For this reason, our philosophy is based on five pillars: thalassotherapy and natural treatments, medical treatments, nutrition, physical activity and emotional balance. The approach from all these dimensions allows an effective and complete treatment to improve health.

THALASSOTHERAPY TREATMENTS

THALASSOTHERAPY, benefits of seawater

Therapeutic method using marine elements (seawater, mud, algae, and climate). A natural therapy used since Greek times, the key to it is the chemical properties of the sea and its related elements, substances which are in human plasma such as sodium, magnesium, potassium, or iodine; when absorbed by the body by osmosis, they favour health recovery. Seawater is used at body temperature, which has multiple benefits:

It improves locomotor system conditions, speeding up bone, muscle, tendon, and ligament recovery processes.

It improves rheumatological conditions such as arthritis, fibromyalgia, and osteoarthritis.

Exercising in seawater improves mobility and stimulates injury recovery.

It relaxes the musculature and has an analgesic and anti-inflammatory effect.

It improves the vascular system, at both venous and lymphatic levels.

It accelerates body fat reduction, with positive effects on cellulite and obesity.

It promotes psychic activity and improves physical strength. It induces mental rest to fight insomnia, depression, and anxiety.

It improves respiratory conditions like asthma. It improves chronic skin conditions like chronic dermatitis, atopy, and psoriasis.

In the aesthetic field, thalassotherapy improves tissues, fights sagging and cellulite, and it slows down skin aging.
