SERVICE CHARTER

# Integrative Gynaecology

At Palasiet, we offer integrative, regenerative and functional gynaecological medicine services that combine advanced technologies with a personalised approach to restore, rejuvenate and optimise intimate health. We take a comprehensive approach to symptoms associated with ageing, hormonal imbalances, sexual dysfunction, postpartum or postoperative changes, menopause and conditions such as vaginal atrophy, mild urinary incontinence and vaginal laxity. Using minimally invasive therapies, we seek to improve our patients' quality of life, functionality, and self-esteem.

## **INTEGRATIVE GYNAECOLOGY SERVICE CHARTER**

### **Integrative Gynaecology Consultation**

First visit for a complete medical evaluation and therapeutic plan, and a second visit to discuss the results.

### **Informative visitRegenerative and Functional Gynaecology**

Informative visit (to be deducted from the total price in case of treatment).

### **Menopause Consultation**

First visit includes a test and personal interview, and a second visit where the results obtained in the first visit will be discussed and a personalised treatment plan will be proposed.

### **PRP vulvovaginal regeneration**

Infiltration of platelet-rich plasma to improve tissue regeneration, sensitivity and vaginal lubrication.

### **Growth factors for vulvovaginal regeneration**

Procedure to achieve tissue regeneration in the vulvovaginal area, improving its hydration and elasticity.

### **Epixlife Test (epigenetics)**

First visit includes the test and a personal interview, and second visit includes a treatment plan.

### **Mesotherapy with hyaluronic acid for vaginal hydration**

Treatment focused on hydrating, biostimulating and restoring the tissues of the intimate area.

### **Vulvar depigmentation**

Procedure that reduces hyperpigmentation in the intimate area.

### **Exosomes**

These are extracellular vesicles that communicate with cells and have regenerative, antioxidant and anti-inflammatory properties.
